

Catalog '25-26

An Ode To An Old Friend

I met Darrel Apps when I was in grade school. I vaguely remember walking through his yard in Pennsylvania while he and my father conversed on some of the finer daylilies in his collection. My dad would point at one pretty flower after another, and Darrel would most likely tell him what was wrong with that variety or why it would not work for Centerton. I did not know it at the time, but the two of them were busy coming up with a plan for what would become the Trophytaker® Daylily program.

Fast forward a few years, Darrel and his wife Marilyn had moved to southern New Jersey. Darrel was now 100% dedicated to daylily breeding. He had a variety that he wanted us to see. It was a dusty pink flower with a slightly darker eyezone. At first glance, you probably wouldn't think much of it - which is how we felt when we first laid eyes on it. Darrel explained its lineage, showed us its parents (one of which was a lovely shade of brown!), and showed us the data he had collected on this selection. That plant became 'Rosy Returns', which became the backbone of Happy Ever Appster® Reblooming Daylilies.

During my high school and into college years, I spent time at Darrel and Marilyn's farm, helping Darrel collect data on seedlings, walking the fields, observing pre-selections - but mostly we just talked about plants. What makes a plant good? What makes it marketable, tough to grow, attractive to retail customers - what makes a plant better than another one? For all the amazing daylilies that Darrel gave us through the years, the time spent with him in these discussions are the flash-point in my horticultural career. Growing up on the nursery, I always had chlorophyll in my veins; but I believe my passion for plants was unlocked by that time spent with my friend Darrel.

I, my family, and our business owe so much to those who helped build it, and Darrel sits on our Mount Rushmore of the people that made this company what it is today. Darrel passed away last week, and our hearts will always have a small empty space because of it. Our time here is temporary - and some people are capable of making the absolute most of that tenure. Darrel was one such individual.

Bob Blew, Tuesday, 26th of May, 2025

Product Sizes

Within this catalog, next to nearly all items you will see a size identifier. For items grown in multiple sizes, they are individually stated as such.

Furthermore, the color that each size appears in will match the color container in which the item is grown.

For example, concerning Chelone 'Hot Lips':

'Hot Lips' #2 #1

This item is grown in a signature BlewLabel® blue #2 container and an Autumn Additions #1.

About This Catalog

We're wholesale, not configured for mail order or retail. This catalog is produced as a fun, informative aid to enthusiasts. Commentary herein is based on available knowledge and estimated results under average conditions. Significant variations occur with locales, sites, season conditions, and gardening styles. Please think of the data (measurements, bloom times, tolerances and color descriptions) as comparative guides.

For each genus listed within this catalog, you will find a series of icons that refer to certain exposure tolerances and other attributes that make certain groups of plants stand out. Please use the legend below to identify each icon.

Caterpillar Candy® Host Plants

Provide host plants for caterpillars in your back yard!

Caterpillar Candy® are butterfly host plants for summer sales.

Each variety has been carefully selected to entice specific species of butterfly to your customers' gardens. These are grown naturally, with no chemical pesticides used - so they are safe for those little critters to munch on. More host plants turns into more caterpillars. More caterpillars turns into more butterflies for your back yard. These are all sold in quart pots (in trays of ten) with targeted availability for June through August - when caterpillars are most active.

Pearly Everlasting

Partridge Pea

Anaphalis margaritacea (Pearly Everlasting) NEW 2025

(American Lady) - drought-tolerant U.S. native perennial of grey/green slender foliage topped with clusters of small white flowers.

Anethum graveolens (Dill)

(Black Swallowtail) - annual herb of thin foliage that becomes covered in yellow flower clusters in summer.

Antennaria plantaginifolia (Plantain-Leaf Pussytoes)

(Painted Lady) - groundcover of grey/green leaves bearing small creamy-white flowers mid spring to early summer.

Antirrhinum majus (Snapdragon)

(Common Buckeye) - tender perennial (grown as an annual) bearing flower spikes of colors ranging from white to pink, red, yellow, and orange.

Asclepias incarnata (Swamp Milkweed)

(Monarch) - easy-to-grow native perennial of upright stalks bearing slender mintgreen foliage and pink flower clusters in summer. Reaches 4-5' in height.

Asclepias tuberosa (Butterfly Milkweed)

(Monarch) - perhaps the most popular U.S. native for butterfly enthusiasts. low-care perennial of deep-green slender foliage bearing bright-orange flower clusters in early summer. reaches 2-3' tall and wide.

Baptisia australis (False Blue Indigo)

(Orange Sulphur) - large mounding perennial of sturdy light-green stalks bearing small rounded leaves and spikes of soft blue/lavender flowers in late spring.

Boehmeria cylindrica (False Nettle)

(Red Admiral) - vigorous U.S. native that, unlike other members of the Nettle family, does not have stinging hairs. this plant also hosts the Eastern Comma caterpillar.

Callirhoe involucrata (Purple Poppy Mallow)

(Common Checkered Skipper) - mounding perennial native to dry soils of the East and Midwest U.S. bearing magenta flowers in late spring. grows 12" tall by 2-3' wide.

Chamaecrista fasciculata (Partridge Pea) NEW 2025

(lo Moth) - native annual of soft-textured Mimosa-like foliage topped with unique yellow pea-like flowers from late spring through late summer. the leaves are touch-sensitive (they will fold up when touched).

Chelone glabra (White Turtle Head)

(Baltimore Checkerspot) - late summer flowering U.S. native of deep-green glossy foliage with white flower spikes.

Foeniculum vulgare purpureum (Bronze Fennel)

(Black Swallowtail) - fragrant, airy, fern-like bronze/green foliage. yellow flower clusters bloom in early summer. remove spent blossoms to prevent reseeding.

Lindera benzoin (Northern Spice Bush)

(Spice Bush Swallowtail) - U.S. native shrub that forms a 6-12' tall and wide lowcare frame of deep-green. small yellow/green flowers bloom in early spring before foliage appears. bright golden-yellow autumn foliage.

Lonicera sempervirens (Honeysuckle)

(Hummingbird Clearwing Moth) - native perennial vine of deep-green foliage topped with numerous red/yellow trumpet-shaped petals in spring and summer.

Lupinus perennis (Wild Lupine)

(Karner Blue) - bright-green unique foliage in a palm-like structure becomes topped with flower spikes of purple/blue flowers in mid/late spring through early summer.

Caterpillar Candy®

labels display an illustration of both the butterfly and caterpillar that each plant is trying to attract...

and clearly show the gardener how **Caterpillar Candy**[®] will help bring butterflies to their yard.

Magnolia virginiana (Sweet Bay Magnolia)

(Eastern Tiger Swallowtail) - U.S. native large shrub (or small tree) of large slender semi-gloss deep-green leaves bearing creamy-white flowers in mid/late spring. this plant commonly reaches 10-30' tall and wide.

Malva sylvestris (Common Mallow)

(Painted Lady) - hollyhock-relative bearing flower spikes of bright-pink with deepburgundy stripes on petals.

Passiflora incarnata (Purple Passion Vine)

(Red-Banded Hairstreak) - climbing vine of bright-green unique-shaped foliage that bears incredible flowers of lavender/white sepals and purple hair-like petals.

Petroselinum crispum (Flat-Leaf Parsley)

(Black Swallowtail) - this annual herb grows well in both gardens and in containers, and it's a true favorite of the Black Swallowtail.

Rudbeckia fulgida (Black-Eyed Susan)

(Silvery Checkerspot) - U.S. native perennial of deep-green slender foliage that becomes covered in 2-3" golden-yellow flowers in summer and early autumn.

Ruta graveolens (Rue)

(Giant Swallowtail) - perennial of blue/green foliage topped with yellow flowers in summer reaching 2-3' tall and wide.

Salix discolor (Pussy Willow) NEW 2025

(Mourning Cloak) - native shrub of fluffy creamy white/yellow flowers in early spring followed by mint-green foliage. male plants will have grey catkins in late winter.

Sedum ternatum (Woodland Stonecrop)

(Variegated Fritillary) - U.S. native perennial of mint-green succulent leaves bearing white flower clusters in mid/late spring. grows in a groundcover habit 3-6" tall and 10-12" wide.

Symphyotrichum novae-angliae (New England Aster)

(Northern Crescent) - U.S. native perennial of deep-green slender foliage bearing scads of purple/magenta daisies in late summer. a beacon of color for late season. ranges 3-6' tall by 2-3' wide.

Trifolium repens (White Clover)

(Eastern Tailed Blue) - carefree perennial groundcover of deep green bearing white puffball flowers in late spring. spreads by branches putting out roots, so give it a little room to expand with time or keep in a container.

Verbena stricta (Hoary Vervain)

(Common Buckeye) - unique perennial of tooth-cut mint-green foliage topped with flower spikes of lavender/purple rising up to six feet high in mid/late summer.

Vernonia lettermannii (Ironweed)

(American Lady) - U.S. native perennial of deep-green thread-like leaves topped with purple flowers in late summer. reaches 2-3' tall and wide.

Viola sororia (Common Blue Violet)

(Great Spangled Fritillary) - U.S. native groundcover perennial of rounded leaves bearing purple flowers in spring. spreads by rhizomes, so give it room to expand with time.

Zizia aurea (Golden Alexander) NEW 2025

(Black Swallowtail) - unique mounding perennial of deep-green foliage with round clusters of bright-yellow flowers in mid/late spring.

Woodland Stonecrop

New England Aster

Golden Alexander

This coming spring, **Chef Jeff**[®] enters a new space for gardening: your kitchen! Offered in adorable packaging that will be successful on your patio, in your garden, or best yet, on your kitchen windowsill anywhere with water and sunlight.

Having the space, time, or ability to maintain a massive outdoor garden is not a luxury all gardeners have. But should that mean they don't still desire the gratification or top-notch flavor or growing their own vegetables? By selecting plants suited for indoor conditions, Chef Jeff's® Kitchen will serve a new space of gardens for a new generation of gardeners.

CHEF JEFF 'S® *Kitchen*

HERBS

Basil 'Bonsai' 6" NEW 2026

(Rosmarinus officinalis) - dwarf mounding form of the classic garden herb, with the same flavor, but on a much easier-to-manage habit.

Mint - Spearmint 6" NEW 2026

(Mentha spicata) - highly-adaptable perennial herb, signature minty flavor.

Oregano 6" NEW 2026

(Origanum vulgare) - the Italian-cuisine mainstay used in countless dishes both fresh and dried.

Parsley - Fernleaf 6" NEW 2026

(Petroselinum crispum 'Menuette') - a fluffy twist on curly-leaf Parsley, with the same flavor but with a softer-textured, more fern-like leaf.

Rosemary 6" NEW 2026

(Rosmarinus officinalis) - Slender leaves of deep green with an intense floral flavor and aroma.

Sage - Common 6" NEW 2026

(Salvia officinalis) - slender leaves of silvery-green with robust aromatic flavor.

Stevia 'Sugar Love' 6" NEW 2026

(Stevia rebaudiana) - vegetative selection of Stevia that has better branching and a more compact habit than seed-grown plants, making it a great choice for growing in small containers.

Thyme 6" NEW 2026

(Thymus vulgaris) - mounding perennial of small deep-green fragrant leaves.

VEGETABLES

Cucumber 'Quick Snack' 6" NEW 2026

(Cucumis sativus) - cute 3" long fruit borne on a compact vining habit.

Pepper 'Fresh Bites' Series 6" NEW 2026

(Capsicum annuum) - the perfect snacking pepper with robust sweet 3-4" fruit on a compact upright form.

- 'Orange'

- 'Red'
- 'Yellow'

Pepper 'Hot Fajita' 6" NEW 2026

(Capsicum annuum) - 4" cayenne-type chilis with medium heat and glossy red flesh.

Tomato 'Heartbreaker Red' 6" NEW 2026

(Solanum lycopersicum) - bright red cherry tomatoes on a super-compact (but still great yielding) habit.

Tomato 'Joy' Series 6" NEW 2026

(Solanum lycopersicum) - bite-size tomatoes with high yields on cute-and-tidy table-top habits.

- 'Red'
- 'Yellow'

Tomato 'Sunny Drops Orange' 6" NEW 2026

(Solanum lycopersicum) - bright-orange heart-shaped fruit borne on a tidy mounding habit.

Chef Jeff 's[®] Herbs

ARTEMISIA

Cola Plant PT

(A. arbotanum) - mounding herb of rich-green threadleaf foliage that gives the flavor and aroma of cola.

BASIL

'Bonsai' PT NEW 2026

(Ocimum basilicum) - dwarf mounding form of the classic garden herb, with the same flavor, but on a much easier-to-manage habit.

'Emerald Towers' PT

(Ocimum basilicum) - upright form of Sweet Basil that flowers late in the season, giving an extended harvest window.

Greek Globe PT

(Ocimum basilicum) - small-leaf basil with intense aroma and spicy flavor. grows in a rounded globe shape.

Lemon PT

(Ocimum x citriodorum) - narrow leaves with a strong fragrance of lemon. a staple of south-Asian cuisine.

'Red Rubin' PT

(Ocimum basilicum) - a flavor similar to a mild sweet basil but with deep red/ burgundy leaves.

Sweet (Genovese) PT

(Ocimum basilicum) - the classic basil flavor used round the globe.

Thai PT

(Ocimum basilicum) - licorice-scented leaves. often used with stir fry dishes.

CALENDULA

'Bon Bon' Mix PT

(Calendula officinalis) - mixture of yellow/orange/gold antioxidant-rich edible flowers.

CAT GRASS

Cat Grass PT

(Dactylis glomerata) - easy-to-grow herb that your cats will love.

MeWow Variegated Cat Grass PT

(Hordeum vulgare) - variegated form (mixture of pure white and solid green blades).

CATNIP

Catnip PT

(Nepeta cataria) - make your cats go crazy for this tasty treat.

MeWow Lemon Catnip PT

(Nepeta cataria) - lemon-scented leaves. perfect for your feline friends.

CHIA

Chia PT NEW 2025

(Saliva hispanica) - a Salvia native to Central America that produces chia seeds.

'Sunny Drops Orange'

'Bonsai'

MeWow Lemon Catnip

7

Garlic Chives

Culantro

Eucalyptus

'Lavance Deep Purple'

CHIVES

Chives PT

(Allium schoenoprasum) - rounded stems bearing lavender flowers in late spring.

Garlic Chives PT

(Allium tuberosum) - similar to regular chives but with a distinctive garlic flavor.

CILANTRO/CORIANDER

Cilantro/Coriander PT

(Coriandrum sativum) - a pungent-flavored relative of parsley that is a must-have for salsa and guacamole.

Lemon Cilantro PT

(Coriandrum sativum) - similar flavor to regular Cilantro but with a distinct lemon aroma.

CITRONELLA

Mosquito Plant QT 6"

(Pelargonium graveolens) - scalloped leaves of rich green have an intense scent of citrus. can also be used in potpourri.

CROCUS

Saffron PT NEW 2025

(Crocus sativus) - grow your own saffron to add both color and flavor to ethnic dishes from around the world.

CULANTRO

Culantro PT NEW 2026

(Eryngium foetidum) - tropical native perennial that has the flavor of Cilantro but packs a much stronger punch.

DILL

Bouquet Dill PT NEW 2025

(Anethum graveolens) - large variety that yields frilly edible leaves and clusters of edible yellow flowers. nearly all above-ground parts of this plant are edible.

Fernleaf Dill PT

(Anethum graveolens) - vigorous grower bearing dainty leaves that are necessary for many fish, poultry, and pickling recipes.

EUCALYPTUS

Eucalyptus PT NEW 2025

(Eucalyptus cinerea) - aromatic silver foliage that can help repel pesky insects from your garden or patio. also produces essential oils that are used in remedies.

FENNEL

Fennel PT

(Foeniculum vulgare) - licorice-flavored plant that produces leaves, stalks, and a bulb that are all edible.

LAVENDER

'Hidcote' PT

(Lavandula angustifolia) - fragrant silvery-green foliage bearing deep blue flowers in early summer. sweet, floral, citrus flavor.

'Lavance Deep Purple' PT NEW 2026

(Lavandula angustifolia) - semi-dwarf form with the same fragrant foliage, purple flowers, and citrus flavor of standard English Lavender.

'Munstead' PT

(Lavandula angustifolia) - fragrant silvery-green foliage bearing purple flowers in early summer. sweet, floral, citrus flavor.

LOVAGE

Lovage PT NEW 2025

(Levisticum officinale) - upright perennial of maple-like foliage and yellow flowers. leaves and seeds can be eaten and have a strong parsley/celery-like flavor.

MARIGOLD

'Durango Tangerine' PT

(Tagetes patula) - bright orange double flowers on a compact frame. flower petals have a peppery citrus flavor and the roots of this plant can help control nematodes.

'Durango Yellow' PT

(Tagetes patula) - same as 'Tangerine' but with bright-yellow flowers.

MARJORAM

Sweet Marjoram PT

(Origanum majorana) - Middle-Eastern substitute for standard oregano. citrus flavor tones.

MINT

Basil-Leaf Mint PT NEW 2025

(Mentha x piperita) - unique blend of mint and basil flavor/aroma (and even looks somewhat like basil) that adds a tangy flavor to countless fresh dishes.

'Berries & Cream' PT NEW 2025

(Mentha x) - hybrid mint of deep-green aromatic leaves that lend a fruitful berry/mint flavor to fresh dishes and drinks.

Kentucky Julep PT

(Mentha spicata) - the perfect companion plant for the most prestigious of horse races.

Orange Mint PT

 $({\sf Mentha} \times {\sf piperita}) \ {\rm -peppery-citrus} \ {\rm aroma} \ {\rm and} \ {\rm flavor} \ {\rm in one} \ {\rm easy-to-grow} \ {\rm package}.$

Peppermint PT

(Mentha × piperita) - dark-leaved red-stemmed perennial with a peppery flavor and aroma.

Spearmint PT

(Mentha spicata) - highly-adaptable perennial herb, signature minty flavor.

Strawberry PT

(Mentha piperita) - gives the flavor of strawberry with a hint of chocolate. can be used in teas, desserts, and salads.

Variegated Pineapple PT

(Mentha suaveolens 'Variegata') - fruit-scented leaves of deep green edged in creamy white. best used in teas and sweet dishes.

NASTURTIUM

'Alaska' PT

(Tropaeolum majus) - mixture of red/orange/yellow edible flowers above variegated foliage. young leaves are edible in addition to the flowers.

'Baby Orange' PT NEW 2025

(Tropaeolum minus) - electric orange edible flowers held on a miniature frame reaching about 12" tall and slightly wider. great for containers or small gardens.

'Baby Rose' PT NEW 2025

(Tropaeolum minus) -just like 'Baby Orange' but with brilliant magenta/rose flowers.

Nasturtium PT

(Tropaeolum majus) - rounded, slightly-scalloped leaves beneath flowers of red/ orange/yellow. a colorful and peppery addition to salads.

OREGANO

Golden Oregano PT

(Origanum vulgare 'Aureum') - forms a compact mound of golden-yellow foliage that can be used in similar fashion to regular Oregano.

Greek Oregano PT

(Origanum vulgare var. hirtum) - flavor similar to (albeit somewhat stronger than) standard oregano. much more aromatic.

Lovage

Basil-Leaf Mint

Variegated Pineapple Mint

'Baby Rose'

'Hot & Spicy'

Fernleaf Parsley

Creeping Rosemary

Tricolor Sage

'Hot & Spicy' PT

(Origanum vulgare ssp. hirtum) - a more robust choice than Italian Oregano. great in salsa or chili.

Italian Oregano PT

(Origanum x majoricum) - a hybrid of regular Oregano and Marjoram, giving it a sweeter flavor than a standard variety.

Mexican Oregano PT

(Lippia graveolens) - Southwest U.S. native is actually closer related to Verbena, but is used much like Oregano in Tex-Mex cuisine.

Oregano PT

(Origanum vulgare) - the Italian-cuisine mainstay used in countless dishes both fresh and dried.

PARSLEY

Curly Leaf Parsley PT

(Petroselinum crispum) - often used as a garnish, this also works to add both texture and flavor to many recipes.

Fernleaf Parsley PT NEW 2025

(Petroselinum crispum 'Menuette') - a fluffy twist on curly-leaf Parsley, with the same flavor but with a softer-textured, more fern-like leaf.

French Parsley PT

(Anthriscus cerefolium) - also known as 'Chervil', this mild-flavored choice is often found in French cuisine recipes.

Italian Flat Leaf Parsley PT

(Petroselinum crispum var. neapolitanum) - used almost universally in sauces, soups, meat, and countless dishes around the world.

ROSEMARY

'Barbecue' PT

(Rosmarinus officinalis) - upright form of long straight branches. great for grilling and aromatic bouquets.

Creeping PT

 $({\sf Rosmarinus}\ officinalis\ prostratus)$ - low-growing form of blue-green foliage with bright blue flowers in summer.

Rosemary PT

(Rosmarinus officinalis) - slender leaves of deep green with an intense floral flavor and aroma.

'Spice Island' PT NEW 2026

(Rosmarinus officinalis) - upright habit reaching nearly three feet by season's end. soft blue/lavender flowers in summer.

'Tuscan Blue' PT

(Rosmarinus officinalis) - similar to standard Rosemary but with an upright habit and bright blue/purple flowers in summer.

RUE

Rue PT

(Ruta graveolens) - its bitter flavor is often used in Ethiopian cuisine as well as many Mediterranean dishes. its aromatic leaves also have insect repelling qualities.

SAGE

Common Sage PT

(Salvia officinalis) - slender leaves of silvery-green with robust aromatic flavor.

Pineapple Sage PT

(Salvia elegans) - bright green fruity aromatic leaves. cherry/magenta flowers in summer.

Purple Sage PT

(Salvia officinalis) - flavor similar to standard sage but with purple/lavender hue foliage.

Tricolor Sage PT

(Salvia officinalis) - flavor similar to standard sage but with deep green/purple leaves variegated in creamy-white.

SORREL

French Sorrel PT NEW 2025

(Rumex scutatus) - clump-forming perennial of edible heart-shaped leaves. adds a tart (hint of lemon) flavor to soups, salads, and sauces.

'Raspberry Dressing' PT

(Rumex sanguineus var. sanguineus) - red-veined bright-green leaves make a great addition to salads. lends a flavor similar to that of raspberry vinaigrette.

STEVIA

Nature's Sweet Herb PT

(Stevia rebaudiana) - an herb with the sweetness of sugar but none of the calories. add to desserts, teas, and fresh dishes to add a hint of sweetness.

TARRAGON

French Tarragon PT

(Artemisia dracunculus) - slender leaves of rich green add essential flavor for countless French recipes. a necessity for authentic Bearnaise sauce.

Russian Tarragon PT

(Artemisia dracunculus) - similar to the French variety except being stronger in growth while milder in flavor.

TEUCRIUM

Evergreen Germander PT NEW 2025

(Teucrium chamaedrys) - dwarf mound with glossy deep green leaves on a boxy habit. Pink flowers in mid/late spring. used in many herbal remedies.

THYME

English Thyme PT

(Thymus vulgaris) - mounding perennial of small deep-green. considered by many to have the strongest "Thyme" flavor.

French Thyme PT

(Thymus vulgaris) - mounding perennial of small deep-green. the classic aromatic "Thyme" flavor.

Lemon Variegated PT

(Thymus × citriodorus 'Variegata') - small rounded leaves of deep green edged in yellow. bright lemony flavor.

'Pizza' PT NEW 2026

(Thymus vulgaris) - a totally unique selection of Thyme with deep-green leaves that give the flavor and aroma of both Thyme and Oregano.

'Wine & Roses' PT

(Thymus vulgaris) - low-growing mat of deep green. bright pink flowers in spring. slightly milder flavor than standard Thyme.

WATERCRESS

Watercress PT NEW 2026

(Nasturtium officinale) -leafy green that is grown for its peppery flavor.

Chef Jeff 's[®] Summer Coolers

These great herbs are perfect for making fantastic cocktails (alcoholic or non) from your own backyard. They also make excellent gifts!

Kiwi Strawberry Mojito PT

(Mentha piperita) - strawberries and strawberry mint make for a patio-perfect refreshment.

Lime Mint Mule PT NEW 2025

(Mentha x vilosa) - the classic mint look but with a twist of lime flavor/aroma. great for using in fresh salads or a cool summer cocktail.

Mint Julep PT

(Mentha spicata) - put on your best hat and derby away with this Kentucky classic.

French Sorrel

French Tarragon

'Pizza'

Watercress

German Chamomile

Mint - Chocolate

'Imperial Star'

Mint Mojito PT

(Mentha vilosa) - made with the genuine Cuban mint, this is the perfect cocktail for summer ... or spring ... or ... anytime.

Chef Jeff 's[®] Herbal Tea Collection

Great for tea-drinkers and gardeners alike, this collection of herbs will add some spice to your morning cup.

German Chamomile PT

(Matricaria chamomilla) - treat everything from headaches to insomnia.

Lemon Balm PT

(Melissa officinalis) - has a lemony mint flavor that treats a number of ailments from stomach pains to anxiety.

Lemon Verbena PT

(Aloysia citrodora) - teas from this plant are both high in antioxidants and aid with arthritis.

Mint - Apple PT

 $(\ensuremath{\mathsf{Mentha}}\xspace{\,\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{mes}}}}\xspace{\,\mathsf{suremath{\mathsf{suremath}}}}\math{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath}}}}\math{\math{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath{\mathsf{suremath}}}}\math{\math{\mathsf{suremath{\mathsf{suremath}}}}\math{\math{\math{\mathsf{suremath}}}}\math{\math{\mathsf{suremath{\mathsf{suremath}}}}\math{\math{\math{\mathsf{math}}}}\math{\math{\mathsf{suremath{\mathsf{suremath}}}}}\math{\math{\math{\mathsf{suremath}}}}\math{\math{\mathsf{math}}}\math{\math{\mathsf{suremath}}}}\math{\math{\math{suremath{\mathsf{suremath}}}}}\math{\math{\math{\mathsf{suremath}}}}\math{\math{\mathsf{suremath}}}}\math{\math{\math{suremath{\mathsf{suremath}}}}\math{\math{\math{suremath{\mathsf{math}}}}\math{\math{\mathsf{suremath}}}}\math{\math{\math{suremath{\mathsf{suremath}}}}\math{\math{\math{suremath}}}\math{\math{\math{suremath}}}}\math{\math{\math{suremath}}}\math{\math{suremath{m}}}}\math{\math{\mathsf{M}}}\math{\math{m}}}\math{\math{suremath}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\math{\math{m}}\mat$

Mint - Chocolate PT

(Mentha × piperita) - aids with fevers, headaches, and stomach aches. has a peppery chocolate flavor.

Mint - Grapefruit PT

 $({\sf Mentha}\times{\sf piperita}) \text{ - lends that distinct citrus flavor to teas. also works well in fruit salads.}$

Mint - Lemon PT

(Monarda citriodora) - aids with fevers, headaches, and stomach aches. similar in flavor to Apple Mint, but with a citrus aroma.

Mint - Spearmint PT

 $(\mbox{Mentha}\xspace{spicata})$ - aids with fevers, headaches, and stomach aches. the classic Mint tea flavor.

Tricolor Sage PT

(Salvia officinalis) - a great choice to help a sore or scratchy throat.

Chef Jeff 's® Vegetables

ARTICHOKE

'Imperial Star' QT

(Cynara scolymus) - first-year bearing variety that will yield 3-4" buds in late summer.

ASPARAGUS

'Jersey Giant' QT

(Asparagus officinalis) - garden perennial bearing large deep green spears year after year.

BEAN (GREEN BEAN, PEA, LIMA)

'Black Wax Pencil Pod' (Heirloom) PT

(Phaseolus vulgaris) - bush-bean type with bright golden-yellow pods containing shiny black seeds.

'Blue Lake' Bush Bean PT

(Phaseolus vulgaris) - no support necessary for this easy-to-grow green bean.

'Dragon Tongue' (Heirloom) **PT**

(Phaseolus vulgaris) - bush-type bearing 6-8" pods of creamy white speckled with purple. can be eaten whole or shelled.

'Green Arrow' Bush Pea (Heirloom) PT

(Pisum sativum) - disease-resistant, easy-to-pick, great-tasting peas on compact 24" plants.

'Jade' Bush Bean PT

(Phaseolus vulgaris) - compact plants bearing 6-7" dark-green pods. diseaseresistant strain.

'Black Wax Pencil Pod'

'Kentucky Wonder' (Heirloom) PT

(Phaseolus vulgaris) - pole-bean type with 8-9" soft green pods.

'King of the Garden' Lima PT

(Phaseolus lunatus) - pole-type Lima bean producing quarter-sized bright green beans.

'King Tut' Pea (Heirloom) PT

(Pisum sativum) - deep-purple pods with bright green peas inside. rumored to have been discovered in King Tutankhamun's tomb.

'Lincoln' Shelling Pea PT

(Pisum sativum) - 4-5" pods of super-sweet peas. great for freezing, canning, or eating fresh.

'Mascotte' PT

(Phaseolus vulgaris) - dwarf bush-bean type that is perfect for containers/window boxes. produces countless 3-4" pods that are thin, tender, and delicious.

Pole Bean PT

(Phaseolus vulgaris) - standard green pole bean.

'Purple Queen' PT

(Phaseolus vulgaris) - bush-bean type bearing 5-6" pods of deep purple with green inners.

Sugar Snap Pea PT

(Phaseolus vulgaris) - eaten whole or shelled, cooked or raw, this is one of the most versatile beans around.

BEET

'Red Ace' PT

(Beta vulgaris) - pure-red beet with strong stems. remains tender even if harvested late.

'Touchstone Gold' PT

(Beta vulgaris) - auburn-skinned beet with a glowing golden-yellow interior.

BROCCOLI

Broccoli 804 PT

(Brassica oleracea var. italica) - large florets of deep green. chock full of antioxidants.

BROCCOLINI

Broccolini 804

(Brassica x oleracea) - formed from a cross between broccoli and asparagus, it carries the flavor of both but has a much more tender texture than traditional broccoli.

BRUSSELS SPROUTS

Brussels Sprouts 804

(Brassica oleracea var. gemmifera) - small green cabbage-like orbs cover the stems of this cold-season veggie.

CARROT

'Chantenay' PT

(Daucus carota) - classic variety with an orange flesh and red/orange center.

'Glow Stick' (Mix) PT

(Daucus carota) - early-maturing mixture of 8-9" roots in red/white/yellow/orange.

'Purple Haze' PT

(Daucus carota) - AAS winning carrot of purple/red with an orange core.

CAULIFLOWER

Cauliflower 804

(Brassica oleracea var. botrytis) - a healthy and versatile vegetable of pure white crowns above waxy green foliage.

CELERY

'Tango' PT

(Apium graveolens) - high-yielding variety that is slow to bolt and resistant to fusarium.

'Kentucky Wonder^{*}

'Red Ace

Broccolini

'Tango'

'Sweet American Dream'

Cucamelon

English

'Fairytale'

'Chubby Checkers' (Sweet) PT

 $(\mbox{Zea mays})$ - soft yellow kernels are checkered with creamy white. sweet flavor.

'Honey 'n Pearl' (Sweet) PT

(Zea mays) - rich yellow kernels with a few "pearls" of white mixed in. very sweet and fairly quick to harvest.

Popcorn PT 17cm

(Zea mays) - like the name suggests, these stalks will give you ready-to-pop popcorn (butter and salt not included).

(Zea mays) - ears of bright creamy white. preferred by many as the best corn for fresh cooking.

'Sweet American Dream' (Sweet) **PT**

 $({\sf Zea mays})$ - award-winning bicolor noted for its super-sweet flavor, tender texture, and faster-to-harvest time.

CUCUMBER

'Burpless' PT

(Cucumis sativus) - smooth-skinned, deep-green, high-yielding cucumber perfect for any home garden.

Bush Pickle PT

(Cucumis sativus) - if space is at a premium, this bush-form will bear plenty of fruit without vining everywhere.

Cucamelon PT NEW 2025

(Melothria scabra) - cucumber relative that produces long vines bearing grapesized "mini-watermelon" fruit that taste more like a cucumber with a hint of tartness.

English (Premium) PT NEW 2026

(Cucumis sativus) - 10-12" long smooth-skinned high-yielding variety. does best grown with vine support so the long fruit can grow off the ground.

Gherkin PT

(Cucumis sativus) - produces 2-3" cucumbers that are a classic pickling choice.

'Gherking' (Premium) **PT**

(Cucumis sativus) - high-yielding vines bearing 4-5" pickling-style fruit.

Homemade Pickles PT

(Cucumis sativus) - standard bush-pickle type with a pickle-jar label and canning recipes on the back.

Kirby Pickle PT

(Cucumis sativus) - 3-5" stubby cucumbers perfect for pickling.

'Short Snack' (Premium) PT

(Cucumis sativus) - a great addition to any garden. high yields of 6" glossy spineless deep green cucumbers.

'Straight Eight' (Heirloom) **PT**

(Cucumis sativus) - dark green, smooth-skinned slicer type.

'Sweeter Yet' (Premium) **PT**

(Cucumis sativus) - burpless-type that grows 10-12" long by 11⁄2" wide.

'Whopper' (Premium) **PT**

(Cucumis sativus) - bush-type plant bearing 8-10" medium to dark green cucumbers.

EGGPLANT

'Classic' PT

(Solanum melongena) - large near-black glossy fruit.

'Fairytale' (Premium) PT

(Solanum melongena) - unique mottled fruit of deep lavender with creamy-white speckles.

'Gretel' PT

(Solanum melongena) - award-winner of long and slender eggplants of creamy white.

'Hansel' PT

(Solanum melongena) - this counterpart to 'Gretel' produces the same slender and tender fruit but with deep purple flesh.

'lchiban' PT

(Solanum melongena) - Japanese-type eggplant of 10-12" long slender near-black fruit. thin-skinned. sweet and mild flavor.

'Rosa Bianca' (Heirloom) **PT**

(Solanum melongena) - 5-6" ribbed, nearly round lavender fruit. a staple in oldworld Italian dishes.

FERN

Fiddlehead Fern QT

(Matteuccia struthiopteris) - large stately fern with oversized bright green fronds. U.S. native. fiddleheads are harvested in late spring as fronds appear.

GARLIC

White Softneck PT

(Allium sativum) - easy-to-grow Garlic with excellent spicy flavor. yields 15-20 cloves per bulb.

Elephant (Premium) QT

(Allium ampeloprasum var. ampeloprasum) - extra-large bulbs of robust-flavored cloves. can weigh more than a pound per bulb.

LETTUCE - LEAFY GREENS

Buttercrunch 804 PT

(Lactuca sativa var. capitata) - sweet-tasting leafy green found in salads round the globe.

Iceberg 804

(Lactuca sativa) - soft-green leaves with near white centers. the most common head-type lettuce grown in the U.S. anyone up for a wedge salad?

Red Salad Bowl 804

(Lactuca sativa) - frilly leaves of glossy burgundy. a colorful addition to your salads.

Romaine 804 PT

(Lactuca sativa var. longifolia) - upright heads of rich green. a necessity for Caesar salad.

Spring Mix 804 PT

(Lactuca / Eruca / Brassica) - a nutritional and tasty combination of different colors and textures.

LOOFAH

Loofah Sponge PT

(Luffa aegyptiaca) - technically a member of the cucumber family, this fruit dries to form a scrubbing sponge that has been used for hundreds of years.

KALE

Dinosaur (aka Lacinato) PT

(Brassica oleracea 'Lacinato') - slender crinkled/puckered leaves of deep green. a great combination of flavor and beauty.

Kale 804

(Brassica oleracea var. sabellica) - grab a helping of health with this nutritionpacked, easy-to-grow super-food.

'Prizm' PT NEW 2025

(Brassica oleracea var. sabellica) - frilled leaves of blue/green. works well as both an edible and ornamental.

'Red Russian' PT NEW 2025

(Brassica oleracea var. sabellica) -blue/green frilly-edged foliage held on purple/ red stems.

OKRA

'Green Fingers' PT

(Abelmoschus esculentus) - 3-4" deep green buds on a quick-to-harvest plant.

ONION

Bunching Onion PT

(Allium fistulosum) - also known as a scallion or green onion, these are a tender tangy addition to dishes from around the globe.

'Ichiban'

Red Salad Bowl

'Red Russian'

'Green Fingers'

Yellow Sweet Onion

'Better Belle'

'Cherry Bomb'

Red 804

(Allium cepa) - the brightest in color but most mild in flavor.

Shallots PT

(Allium cepa var. aggregatum) - the sweeter, more-mellow alternative to onions.

White Sweet 804

(Allium cepa) - a pure white bulb with an intense "onion" taste.

Yellow Sweet 804

(Allium cepa) - the most common (for good reason). light-yellow flesh with a super-sweet flavor.

PEANUT

Peanut PT

 $(\mbox{Arachis hypogaea})$ - learn how peanuts are grown with this fun package. great for kids and adults alike.

PEPPER

(Capsicum)

We group our peppers into four subsets: **Standard**, **Heirloom**, **Premium**, and **Extreme**. For this list, we have also included the pepper type next to the cultivar name.

Pepper - Standard

'Anaheim' (Mild Green Chili) PT mild heat-level chili pepper with glossy-green flesh. 6-10" long narrow fruit.

'Better Belle' (Green Bell) **PT** thick-walled bell that matures from deep green to red. great for roasting.

'California Wonder' (Green Bell) **PT** the standard green bell for any home garden.

'Cayenne' (Red Hot) **PT** long and skinny red peppers with a distinctive flavor and spicy bite.

'Cherry Bomb' (Red Stuffing Chili) PT bite-sized red peppers with a kick. perfect for stuffing.

'Chipotle' (Red/Green Chili) PT with the craze of at-home smokers, this package gives you everything you need to make your own Chipotle peppers.

'Chocolate' (Burgundy Bell) PT glossy-skinned bell that matures to rich shades of chocolate/mahogany.

'Crushed Red Pepper' (Hot Chili) **PT** this hot number comes with instructions to make your own crushed red pepper-flakes.

'Cubanelle' (Green Spicy Sweet) **PT** a combination of sweet flavor and a little bit of heat make for a highly versatile pepper.

'Fresno' (Red Chili) **PT** low/medium heat (similar to that of a Jalapeño) chili with glossy red flesh.

'Golden Bell' (Yellow Bell) **PT** matures to a golden-yellow color. best if served fresh, but can hold up in a colorful stir-fry.

'Golden Cayenne' (Yellow Hot) **PT NEW 2025** the classic slim-fruit look and heavy kick of spice you know and love from a cayenne type, but with bright golden-yellow flesh.

'Hungarian Hot Wax' (Yellow Hot) **PT** spicy thick-walled slender pepper matures to yellow/orange. great for pickling and roasting.

'Italian Roaster' (Red Italian Long-Hot) **PT** long/skinny peppers turn red once ripe and have quite a kick to them.

'Jalapeño' (Red/Green Chili) **PT** the standard chili pepper with just the right amount of heat.

'La Bomba' (Large Jalapeño) **PT NEW 2025** among the largest of any jalapeño-type pepper with fruit reaching up to 8" long (but still has that classic jalapeño flavor). meant to be harvested green.

'Lilac' (Purple Bell) **PT** bell type that matures to lavender/pink. great addition to veggie trays and stir-fry.

'La Bomba'

'Red Beauty' (Red Bell) PT

the best bell for early maturing to a bright red color.

'Red Bull' (Red Bell) **PT** high-yielding, disease-resistant selection with perfect bell flavor.

'Scotch Bonnet' (Very Hot Red Chili) PT you're getting close to the danger-zone with this Jamaican-type chili.

'Super Banana Supreme' (Yellow Sweet) **PT** when it comes to sandwiches and salads, nothing beats good sweet banana pepper.

'Valencia Orange' (Orange Bell) PT glossy-skinned pepper turning bright orange by harvest time.

Pepper - Heirloom

'Chiltepin' (Small Hot Red) PT native selection from the American Southwest. yields scads of small (but quite hot) red fruit.

'Corno di Toro' (Green/Red Sweet) **PT** also known as 'Bull's Horn', this old-world pepper is perfect for stuffing and roasting.

Pepper - Premium

'Big Bertha' (Green Bell) **PT** the largest of the bell-types with fruit often reaching 7"+ long by 4"+ wide.

'Big Stack' (Green Bell) PT NEW 2025 massive grapefruit-sized sweet bell peppers. can be harvested dark green or allowed to mature to red.

'Longhorn' (Red Italian Long-Hot) **PT** heavy-yielding long-hot style with a little extra heat and gorgeous long fruit.

'Orange Marmalade' (Bell) PT

high-producing. matures to orange color earlier than other orange bells.

'Sport Pepper' (Mini Chili) PT

small-maturing green chili pepper that is most often pickled and served on a Chicago-style hotdog - though you can use these hot sweets any way you like.

'Tabasco' (Hot Chili) PT

these small red peppers are the key to the signature sauce of the same name.

'Trident' (Poblano) PT NEW 2025

large, deep glossy-green, conical-shaped fruit. higher productivity than standard poblano forms.

Pepper - Extreme

'Carolina Reaper' PT

2,200,000 Scoville Heat Units - why would you even want to eat this thing?!

'Ghost Chili' PT

1,000,000 Scoville Heat Units - known by heat-lovers and dare-devils as one of the hottest peppers available.

'Trinidad Scorpion' PT

1,500,000 Scoville Heat Units - for that ever-cherished "melt your face off" flavor, you have come to the right place!

'World's Hottest Caribbean Chili' PT

500,000 Scoville Heat Units - for extreme heat enthusiasts everywhere.

'Yelling Yellow' PT

400,000 Scoville Heat Units - a selection of Scotch Bonnet that boasts both a bright yellow mature color and nearly double the heat.

POTATO/SWEET POTATO

(Solanum tuberosum) - dark purple skin with purple/violet flesh. a fantastic colorful addition to your dining table.

'Irish Cobbler' (Heirloom) QT

(Solanum tuberosum) - smooth-skinned with robust flavor. known for making the best mashed-potatoes.

'French Fingerling' (Heirloom) QT

(Solanum tuberosum) - high-yield variety with a nutty mild flavor.

'Valencia Orange'

'Tabasco^{*}

'Carolina Reaper'

'Adirondack Blue'

'Kaukura'

'Butterbaby'

Gourd Mix

Treasure Island™ Sweet Potato 6"

- 'Kaukura' PP#32003 (Burgundy Leaf)
- 'Makatea' PP#32002 (Chartreuse Leaf)

(Ipomoea batatas) - heart-shaped foliage. bright-orange tubers. these are bred to be both highly ornamental and super-tasty. works great in gardens, containers, and landscapes.

'Red Pontiac' (Heirloom) QT

(Solanum tuberosum) - white flesh beneath bright rust-red skin with shallow eyes. super-sweet flavor.

'Yukon Gold' QT

(Solanum tuberosum) - the quintessential choice for thin-skin and golden yellow flesh.

RHUBARB

'Victoria' 6"

(Rheum rhabarbarum) - widely known as the best variety for cooking, 'Victoria' forms ample stalks of red-streaked green that are perfect for pies and crumbles.

SQUASH

Acorn 'Table Ace' PT

(Cucurbita pepo var. turbinata) - bright orange flesh beneath near-black skin. stores extremely well.

Butternut PT

(Cucurbita moschata) - uniform fruits weighing 4-6 pounds. easy to grow and easy to prepare.

'Butterbaby' PT

(Cucurbita moschata) - personal-sized butternut squash. high-yielding and mildew-resistant.

Gourd Mix PT

(Cucurbita pepo) - easy-to-grow mixture of small colorful gourds that are perfect for autumn decorating.

Spaghetti PT

(Cucurbita pepo) - 8-10" bright yellow fruit with spaghetti-like flesh. a great choice for low-carb lifestyles.

Spaghetti 'Angel Hair' (Premium) PT

(Cucurbita pepo) - personal-sized squash with the signature spaghetti-like yellow interior.

Yellow Neck PT

(Cucurbita pepo) - high-yielding summer squash of bright yellow fruit that are good raw, roasted, fried, or even grilled.

'Zephyr' (Premium) PT

(Cucurbita pepo) - totally amazing yellow summer squash that has a two-toned green end on the fruit. nutty flavor. high-yielding.

Zucchini PT

(Cucurbita pepo) - the most popular of the summer squash, this plant will yield countless deep green fruit that are as versatile as they are tasty.

Zucchini 'Aristocrat' PT

(Cucurbita pepo) - high-yielding quick-to-mature variety of 7-8" deep-green fruit.

Zucchini 'Green Machine' PT NEW 2026

(Cucurbita pepo) - 7-8" dark-green fruit. open habit makes for easier harvesting.

Zucchini 'Spineless Perfection' (Premium) PT

(Cucurbita pepo) - easy-harvest variety with an open habit of spineless branches. bears smooth 8-10" rich-green fruit.

Zucchini - Golden (Heirloom) PT

(Cucurbita pepo) - much like a regular Zucchini but with shorter (somewhat fatter) fruit with glossy yellow skin.

SUNFLOWER

'Mammoth' PT

(Helianthus annuus) - 12"+ bright orange flowers on 10-14' tall stalks.

'Ring of Fire' PT

(Helianthus annuus) - 8" bicolor red/gold flowers on 4-5' tall stalks.

Golden Zucchini

'Soraya' PT

(Helianthus annuus) - 5" golden-yellow flowers on 5-6' tall stalks.

SWISS CHARD

'Bright Lights' PT

(Beta vulgaris subsp. vulgaris) - a rainbow of yellow/red/orange stems beneath deep green crinkled foliage.

'Peppermint' PT NEW 2026

(Beta vulgaris subsp. vulgaris) - glossy, emerald-green leaves are held upright on pink and white striped stalks. a colorful twist on this easy-to-grow super food.

TOMATO

(Solanum lycopersicum)

We have grouped our tomatoes into three subsets: **Standard**, **Heirloom**, and **Premium**. For simplicity's sake, we've put the fruit type next to each variety. The fruit groups are as follows:

Slicer - standard fruit that will work well sliced on sandwiches or diced into salads and other dishes.

Cherry/Currant - small fruits that are perfectly sized for tons of applications.

Plum - because of their moisture content and fruit texture, these are typically used for making sauces, but they will work well for many other applications also.

Beneath each variety, notice whether each plant is determinate (det) bears one round of fruit on a smaller/sturdier frame - or indeterminate (ind) - bears multiple harvest but typically requires more staking and space.

Tomato - Standard

'Beefmaster' (Large Slicer) **PT** (ind) - vigorous vines producing outstanding-flavored fruit.

'Beefsteak' (Large Slicer) **PT** (ind) - ribbed tomatoes of deep red with lots of substance and great flavor.

'Better Boy' (Slicer) **PT** (ind) - a great mid-sized slicer with high-yields.

'Big Boy' (Large Slicer) **PT** (ind) - one of the most popular tomatoes in the U.S. since the 1940s (and for good reason).

'Blue Ribbon' (Large Slicer) **PT** (ind) - a prolific producer of smooth-skinned deep-red 10-15 ounce flavorful fruit.

'Candyland' (Currant) **PT** (ind) - countless miniature bright-red fruit borne on long trusses. super sweet flavor and high yields. AAS Winner.

'Celebrity' (Slicer) **PT** (det) - award-winning yields and fantastic flavor.

'Early Girl' (Small Slicer) **PT** (ind) - one of the earliest to ripen but still produces fruit all summer long.

'Golden Boy' (Orange Slicer) **PT**

(det) - mid-sized slicer that matures to bright orange.

'Husky Red Cherry' (Cherry) **PT** (ind) - this semi-dwarf cherry is perfect for gardens where space is a premium.

'Large Cherry' (Cherry) **PT** (ind) - produces countless deep red tomatoes that mature around 1¼" in size.

'Patio' (Small Slicer) **PT** (det) - dwarf-growing determinate that's perfect for patio containers and window-boxes.

'Pink Girl' (Pink Slicer) **PT** (ind) - fleshy slicer that matures to rich pink.

'Roma Plum' (Plum) **PT** (det) - the standard for making sauces and pastes.

'Sugar Rush' (Cherry) **PT** (ind) - super-sweet cherry tomato with high yields.

'Sweet 100' (Cherry) **PT**

(ind) - our most popular cherry. produces countless (typically much more than 100) small red fruit.

'Bright Lights'

'Beefmaster'

'Celebrity

'Sugar Rush'

'Sweet 'n Neat Red'

'Cherokee Purple'

'Old German'

'Sweet 'n Neat Red' (Cherry) PT

(det) - dwarf determinate cherry producing scads of 1" red fruit on a plant that only reaches 10-12" tall.

'Yellow Plum' (Small Plum) **PT** (ind) - an old-world flavor can be found in these small pear-shaped fruits (also known as 'Yellow Pear').

Tomato - Heirloom

'Abe Lincoln' (Slicer) **PT** (ind) - medium to large orange/red slicer with meaty flesh. sun-scald and split resistant.

'Belgium Giant' (Large Pink Slicer) **PT** (ind) - meaty rich pink fruit that easily get 1½-2 pounds!

'Black Krim' (Purple Slicer) **PT** (ind) - beefsteak-type slicer that matures to burgundy with deeper hues on the top of the fruit.

'Boxcar Willie' (Large Slicer) **PT** (ind) - smooth-skinned deep-red with a juicy texture.

'Brandywine' (Large Slicer) **PT** (ind) - potato-leaf variety supposedly of Amish creation. our most popular heirloom slicer.

'Caspian Pink' (Pink Slicer) **PT** (ind) - large beefsteak-type with bright pink flesh.

'Cherokee Purple' (Burgundy Slicer) **PT** (ind) - burgundy skin is complemented with deep red flesh on the inside.

'Green Zebra' (Striped Green Slicer) **PT** (ind) - 2-3 ounce fruit of lime green with yellow stripes. unique and delicious.

'Jet Star' (Small Slicer) **PT** (ind) - bright red glossy skin. the best yielding of the heirloom types.

'Jubilee' (Yellow/Orange Small Slicer) **PT** (ind) - award-winner of bright orange with hints of yellow/orange/pink on the inside.

'Marglobe' (Slicer) PT (det) - high-yields of round pure red 8-10 ounce fruit.

'Mortgage Lifter' (Large Slicer) **PT** (ind) - the largest fruit of the heirloom types with tomatoes weighing more than two pounds.

'Mr. Stripey' (Orange Slicer) **PT** produces large fruit of mottled red/yellow. totally unique and tasty to-boot.

'Old German' (Orange Large Slicer) **PT** (ind) - marbled flesh of yellow/orange/red. beautiful and delicious.

'Ramapo' (Large Slicer) **PT** (ind) - meaty slicer that, despite its age, is still heavily used in Mid-Atlantic tomato farms because of its yields and flavor.

'Rutgers Select' (Slicer) **PT** (det) - high yields of 6-8 ounce rich red fruit.

'San Marzano' (Plum) **PT** (ind) - the Italian standard for making sauce. it's so important to the Italian economy that there are E.U. regulations about what can be called a 'San Marzano'.

Tomato - Premium

'Amish Paste' (Plum) **PT** (ind) - an old-world selection that is perfect for sauces and canning.

'Chello' (Yellow Cherry) **PT** (ind) - your favorite cherry tomato, but bright yellow in color.

'Defiant' (Small Slicer) **PT** (det) - 6-8 oz. rich-red fruit. highly disease resistant and great flavor.

'Grape' (Small Cherry) **PT** (ind) - produces countless grape sized/shaped bright glossy red fruit.

'Jersey Tomato' (Large Slicer) **PT** (ind) - the standard to New Jersey high-quality high-yielding tomatoes for nearly a century.

'Lemon Boy' (Yellow Slicer) **PT** (ind) - low-acidity makes this a mellow-tasting, but visually appealing tomato.

'Grape'

'Midnight Snack' (Black Cherry) PT

(ind) - glossy black/purple fruit with a bright red interior. improved flavor over previous black-fruit varieties.

'Rapunzel' (Cherry) **PT**

(ind) - an extremely high-yielding variety that can bear trusses of fruit nearly four feet long!

'Rutgers 250' (Large Slicer) PT

(det) - celebrate the 250th anniversary of Rutgers University with this multigenerational improvement on the classic Jersey Tomato.

'Sun Sugar' (Orange Cherry) **PT**

(ind) - by popular demand, we bring you this golden-yellow cherry with very high yields and super-sweet taste.

'Sungold' (Orange Cherry) **PT**

(ind) - the best-yielding alternative color cherry tomato. great yields and even better flavor.

'Super Marzano' (Plum) **PT**

(ind) - the flavor of the classic 'San Marzano' but with a much higher-yielding harvest.

'Supersteak' (Large Slicer) **PT** (ind) - the great taste of a steak-type tomato but with higher yields and larger fruit.

'Sweet Cluster' (Small Slicer) **PT** (ind) - creates trusses with 6-8 small slicing tomatoes.

'Tomatoberry' (Heart-shaped Cherry) PT NEW 2025

(ind) - heavy-yielding variety of strawberry-shaped 1" fruit.

'Whopper' (Large Slicer) **PT** (ind) - yields bright glossy-red fruit measuring more than four inches across.

Chef Jeff 's[®] Fruit

BLACKBERRY

'Arapaho' 6"

(Rubus fruticosus) - thornless variety bearing pure black fruit in mid/late summer on old wood.

'Natchez' 6"

(Rubus fruticosus) - upright thornless variety bearing large black fruit in early/mid summer on old wood.

'Prime-Ark® Freedom' 6"

(Rubus fruticosus) - the standard for flavor and production. super-flavorful fruit in early summer on old wood and then again in late summer on new wood.

BLUEBERRY

'Bonus' 6"

(Vaccinium corymbosum) - large fruit ripening in late season. self-pollinating.

'Duke' 6"

(Vaccinium corymbosum) - large fruit maturing early season. one of the widestused northern highbush varieties.

Mainely Wild[™] 6"

(Vaccinium angustifolium 'Burgundy') - U.S. native variety found throughout the upper Midwest and New England states (perhaps most notably-so in Maine). low-growing groundcover form bearing small but tasty blue fruit in late summer. bright red autumn foliage.

Perfect for Pie 6"

(Vaccinium corymbosum 'Northland') - early/mid season medium-sized fruit with an extra-high sugar content that makes it the perfect candidate for pies and jams.

'Pink Lemonade' 6"

(Vaccinium x) - USDA selection with fruit that matures to a rich pink color. white/ pink flowers in spring. rich burgundy foliage in fall.

'Top Hat' 6"

(Vaccinium corymbosum x angustifolium) - dwarf hybrid bearing mid-season small fruit. an excellent choice for the border or for patio containers.

'Midnight Snack'

'Sun Sugar'

'Arapaho'

Mainely Wild™

'Boysenberry'

'Issai'

'Tweety'

'Large Marge'

World's Largest Blueberry 6"

(Vaccinium corymbosum 'Chandler') - giant guarter-sized fruit maturing mid/late season. full flavor and massive appeal will make this a garden favorite.

BOYSENBERRY

'Boysenberry' 6" NEW 2026 (Rubus ursinus x idaeus 'Boysen') - created as a hybrid between the European Blackberry and the American Dewberry, this blackberry-like fruit bears countless berries that begin as white flowers that yield red fruit maturing to near-black/purple. fruit is ready in mid summer.

FIG

'Fignomenal' PP#32537 (Dwarf Patio Fig) 6"

(Ficus carica) - compact form bearing brown/maroon fruit in late summer. works great in a large patio container that can be moved indoors during cooler months.

GRAPE

'Glenora' (Blue/Black Seedless) 6" NEW 2025

(Vitis labrusca x vinifera) - large clusters of frosty-blue/burgundy fruit in late summer. self-fertile variety.

'Vanessa' (Red Seedless) 6" NEW 2025

(Vitis vinifera) - clusters of medium-sized firm red fruit in late summer and early autumn. much more winter hardy than most grapes (zone 4). self-fertile.

KIWI

'Issai' Hardy Kiwi 6" NEW 2026

(Actinidia arguta) - easy-to-grow vine bearing grape-sized "fuzzless"-skinned fruit that can be eaten whole - no need to peel! self pollinating.

MELON

Canary Melon 'Tweety' PT Re-Intro 2026

(Cucumis melo) - prolific producer of 4-6 pound fruit with bright yellow skin and a firm green/yellow interior.

Cantaloupe 'Athena' PT

(Cucumis melo) - tried-and-true disease resistant selection of bright orange sweet-and-juicy fruit.

Cantaloupe 'Infinite Gold' (Premium) PT

(Cucumis melo) - high-yielding orange fruit with long shelf life capability.

Cantaloupe 'Sugar Cube' (Premium) PT

(Cucumis melo) - personal-sized variety bearing 11/2-2 pound fruit of super-sweet orange flesh.

Honeydew 'Morning Ice' PT

(Cucumis melo) - light-green inside and out, this is one of the best honeydew varieties around for home gardeners.

PUMPKIN

'Casperita' (Miniature) **PT**

(Cucurbita pepo) - creamy-white fruit that are perfect for single-serve baking or decorating an autumn arrangement or patio container.

'Jack-Be-Little' (Miniature) PT

(Cucurbita pepo) - a great single-serve addition to the autumn dinner table (or a great decorative addition).

Large Marge' (30-40 lb Carver) (Premium) PT NEW 2026

(Cucurbita pepo) - extra-large dark orange fruit. unlike many other pumpkins of this size, this variety can grow multiple fruit per vine and still maintain their size.

'Magic Lantern' (15 lb Carver) PT

(Cucurbita pepo) - a perfect medium-sized pumpkin that can be eaten like any pumpkin (or used for making the perfect jack-o-lantern).

Cinderella (Heirloom) PT

(Cucurbita pepo 'Rouge Vif D'Etampes') - a great old-world variety for baking/pies with deep orange-red skin.

RASPBERRY

'Caroline' 6"

(Rubus idaeus) - fall-bearing type. larger fruit than most Raspberries. among the least susceptible to root rot issues.

'Fall Gold' 6"

(Rubus idaeus) - unique variety with bright golden-yellow super-sweet fruit in mid summer and again in autumn.

'Glencoe' 6"

(Rubus idaeus) - thornless variety forming a tidy mound habit bearing deep purple fruit in summer.

'Latham' 6"

(Rubus idaeus) - summer-bearing red Raspberry with super-sweet fruit and fantastic disease resistance.

'Nantahala' PP#20689 6"

Grow your own lettuce blends in this super easy kit. It comes grown in a real stainless steel colander. Cut greens all season long from this attractive (and edible) centerpiece for your patio table.

Chef Jeff's® Specialties

Chef Jeff's® Blenders

For the health-conscious gardener, these easy-to-grow selections are perfect for green smoothies and other heart-healthy recipes.

Kale Yeah! PT

(Brassica oleracea var. sabellica 'Beira') - a large-leaf variety of bright green with a slightly softer texture perfect for blending. also works as a fresh addition to salads or roasting for kale chips.

Spinach - Large Leaf PT

(Spinacia oleracea 'Bloomsdale') - slightly crinkled leaves of deep green. highyielding and slow to bolt.

Wheatgrass PT

(Thinopyrum intermedium) - thin blades of brilliant green. a long-time favorite for smoothie aficionados everywhere.

Taste of Italy[™] Collection

Your new place for authentic old-world Italian flavor. Here the home gardener can find the herb and vegetable additions for the perfect Mediterranean cuisine experience!

Basil 'Prospera Large Leaf' PT

(Ocimum basilicum) - mildew-resistant variety with leaves nearly twice the size of standard sweet Basil.

Bean 'Italian Jumbo' PT

(Phaseolus vulgaris) - flat green bean that can reach sizes up to 10" before harvest. you'll find these in pasta, salads, and casseroles - both raw or cooked - shelled or not.

Cucumber 'Carosello Barese' PT

(Cucumis melo) - southern-Italian vegetable that can be harvested young and eaten like a cucumber or harvested mature and eaten like a melon.

Eggplant 'Barbarella' PT

(Solanum melongena) - Sicilian-style round-fruit eggplant with robust flavor and meaty flesh perfect for grilling, broiling, or adding to a sauce.

Eggplant 'Violetta Lunga' PT

(Solanum melongena) - aka Violetta Lunga di Napoli'. Italian heirloom variety prized for its rich flavor and high productivity.

Parsley 'Gigante d'Italia' PT

(Petroselinum crispum var. neapolitanum) - dark green large-leaf variety yielding large amounts of super-aromatic foliage.

Pepper - Calabrian Chili (Red Chili) PT

(Capsicum annuum) - small, but somewhat spicy, chili peppers typically used in a dried or paste form in Italian cuisine.

Pepper - Long Hots PT

(Capsicum annuum) - as the name would imply, these peppers reach nearly 10" long by 1½" wide and have quite a little kick to them once ripe. this is the classic Italian cayenne-type pepper found on menus everywhere.

Pepper 'Mama Mia' (Sweet) PT

(Capsicum annuum) - high-yielding, award-winning selection of bright orange/ yellow slender fruit. great for grilling, frying, roasting, or eating fresh.

Pepper - Pepper Shooters PT

(Capsicum annuum) - small cherry-type peppers that are perfect for stuffing and serving either immediately or after pickling.

Pepper 'Pepperoncini' (Sweet/Hot) PT

(Capsicum annuum) - an heirloom variety bearing small chili-type peppers with tons of flavor and just a little heat. great for cooking, pickling, and serving fresh.

Radicchio PT

(Cichorium intybus var. foliosum) - despite looking like red cabbage, it's actually a type of chicory. it is found in a range of Italian dishes, from risotto, to pasta, to poultry.

Tomato 'Juliet' (Small Plum) PT

(Solanum lycopersicum) - delivers fantastic plum tomato flavor but with smaller fruit. perfect for snacking, canning, and sauce. also exhibits great disease resistance and long shelf-life.

Tomato 'Viva Italia' (Plum) PT

(Solanum lycopersicum) - for the sauce-fiend gardener this high-yielding plum is the choice for tasty tomatoes ready for making pasta sauce.

Salsarific[™] Collection

Everything you need to make your own salsa at home. This collection includes an array of peppers, allowing the consumer to choose their desired heat level.

Salsarific[™] Pepper - Habanero PT

(Capsicum annuum) - this super-hot chili approaches the danger zone.

Salsarific[™] Pepper - Jalapeño PT

(Capsicum annuum) - for a good bite of heat and classic flavor, this is the go-to pepper.

The plan is quite simple: for anyone purchasing more than \$10,000 worth of Chef Jeff products each

year will get a point-perdollar credit towards the purchase of sales material for the following spring season. For more info, email info@centertonnursery.com.

Salsarific[™] Pepper - 'MexiBell' (Spicy Bell) PT

award-winning cross between bell and chili pepper that produces round sweet fruit but with a nice kick of heat.

Salsarific[™] Pepper - Mucho Nacho (Large Jalapeño) PT

(Capsicum annuum) - heat and flavor similar to a Jalapeño but with fruit nearly twice the size.

Salsarific[™] Pepper - Poblano PT

(Capsicum annuum) - low in heat but big in flavor, these are great for roasting, stuffing, or drying.

Salsarific[™] Pepper - Serrano PT

(Capsicum annuum) - great chili flavor with a bit more heat than your standard peppers.

Salsarific[™] Pepper - Super Chili PT

(Capsicum annuum) - both beautiful and spicy, this bright red chili will rock your taste buds (and clear your sinuses).

Salsarific[™] Tomatillo PT

(Physalis philadelphica) - beige husks shield countless bright green fruit. considered by many as a necessity for authentic salsa. must have two plants to provide pollination.

Salsarific[™] Tomato - Salsa Roma PT

(Solanum lycopersicum) - the perfect plum tomato for slicing, dicing, and building the salsa of your dreams.

Wok Stars[™] Collection

Asian-inspired herbs and vegetables that create the garden of your (stir-fried) dreams.

Cucumber 'Tasty Jade' PT

(Cucumis sativus) - thin-skinned 10-12" long slender fruit.

Edamame PT

(Glycine max) - soybean bred specifically for fresh serving.

Eggplant 'Japanese Millionaire' PT

(Solanum melongena) - early-ripening variety of slightly slender deep purple fruit.

Lemongrass QT

(Cymbopogon schoenanthus) - versatile grass that has both culinary and insect-repelling qualities.

Pak Choy PT

(Brassica rapa subsp. chinensis) - easy-to-grow Asian green that can be served fresh, steamed, stir-fried, or roasted.

Pepper 'Hot-Cha Sriracha' PT

(Capsicum annuum) - a super-tasty (and not too hot) chili pepper that matures to bright red.

Pepper 'Kung Pao' (Asian Chili) PT

(Capsicum annuum) - super-slender peppers with distinctive stir-fry flavor and a fair amount of heat.

Pepper 'Shishito' (Asian Chili) PT

 $(\mbox{Capsicum}\xspace{ annuum})$ - slender green chilis with a smokey, but mild, flavor. perfect for stir-fry.

Pepper 'Thai Dragon' (Hot Asian Chili) PT

(Capsicum annuum) - also known as 'Thai Volcano', this chili will crank up the heat.

Snow Pea PT

CHEF IEF

(Pisum sativum var. saccharatum) - a must-have veggie for countless Asian dishes. typically eaten in the shell.

BlewLabel[®] presents: TrueBlew Natives[™]

BlewLabel® continues to expand its offering of native species-form perennials and shrubs. We know that native plants are a big deal, and are gaining traction every year. To help sort fact from fiction and speculation from regulation, we are taking steps to make it easier for you and the consumer to find the right native plants for their landscape.

We have been highlighting native plants for years. Moving forward, though, we are going to distinguish between "Species Form" (plants in their original state) and "Cultivar" (which have been selected from the wild or bred for a specific color or form).

We are not here to tell anyone that species natives are superior to named native cultivars; but we know there are discerning gardeners specifically looking for the originals - something a bit more true to their original form - a TrueBlew Native[™].

These items will have the tags shown here. It is undeniably BlewLabel[®], but with a slight twist to highlight species form natives, and still grown in the signature BlewLabel[®] blue container.

So whether you merchandise your plants A to Z, or group native plants separately, or go all the way and separate your native species from native cultivars, BlewLabel® will be your go-to choice for easy-to-display, easy-to-sell perennials.

Contact our sales team to learn more about how Centerton Nursery and BlewLabel® are working to change the shape of how we view native plants and how best to offer them in your retail marketplace or landscape installations.

2026 TrueBlew Natives™ Additions

* Amelanchier canadensis (Serviceberry) Andropogon gerardii (Big Blue Stem)

How to read daylily info:

Under each name, you'll find four pieces of data. The first signifies the bloom time (or rather, when they begin to bloom . . . more or less): "E" for early (June), "M" for mid (July), "L" for late (August), and "Re" for rebloom.

The second piece signifies the foliage habit: "Dor" - dormant - the plant dies completely back to the ground during winter. "Sev" - semi-evergreen - the plant partially dies back. "Ev" evergreen - the plant holds green foliage throughout winter. Usually, dormant means hardy and evergreen means not hardy, but that's not always the case.

The third item is the chromosome count. "Dip" stands for diploid, which means there are two sets of chromosomes in each cell. "Tet", or tetraploid, means there are four sets per cell. Most of your fanciest faces come from tetraploids, but your hardiest plants and strongest bloomers tend to be diploid.

Last, and most simply put, is a number that represents the diameter of the flower. Easy! . . . Right?

'Heavenly Angel Ice'

'Jungle Beauty'

'Manicured Majesty'

'Moses' Fire'

'Rhythm & Hues'

'Royal Occasion'

'Siloam Double Classic'

- White Knock Out^{® PP#20273} - more compact than others in the series.

Consumer-Based Website

Our website has two very different sides to it. One side has all of our plant information, shipping, sales, availability, etc....a lot of the things that you would find in this catalog. For more information about our online ordering system, please flip ahead to page 120 and find the heading for "Online Ordering / Availability". The rest of our website, including the main startup page, is completely consumer based. It contains little information about our company, but rather, just our products.

When consumers visit our website, they can discover what plants will grow best in their yard. There is access to more than 2400 pictures (over 95% of all our products have at least one), so they can get a good look at each plant they're interested in. From there, consumers can then learn how to maintain them, fertilize them, and what other plants will do well alongside them. Most importantly, they can utilize our Plant Finder - a filter-based search to find the perfect plants for their garden.

We recently revamped our consumer website from the ground up, using an entirely new platform that serves more images, in greater quality, with enhanced searching capabilities in our Plant Finder section. This new system makes it easier than ever for consumers to find the right plants for them and their landscape. You want a perennial for shade that is good for cut-flowers? We got you. A TrueBlew[™] Native that attracts hummingbirds? We can cover that too.

We also looked at every single photo that existed on our old website and swapped out more than a thousand for newer, sharper, higher-resolution images. In the near future we hope to have an online photo library where you will be able to access thousands of images (free of any watermark or down-scaling) to use for your bench cards, advertising, or social media platforms.

And to drive business directly to you, every page of our website has a location-based dealer search that can bring customers right to your front door using automated geo-location and Google Maps directions.

And because we manage our entire website in-house, we can make edits, updates and changes at any time of the year.

Check www.CentertonNursery.com for updates.

Premium Labeling

Our labeling is among the largest in the industry, with some brands measuring over 70 square inches in area.

In addition to high-quality photography and cultural information, the rear of each tag also contains detailed planting instructions, long-term maintenance and care, and companion plant ideas.

Statistics show that most garden center shoppers consider the plant label to be the #1 source of information, and the quality of that label will directly pertain to how confident the buyer feels when purchasing a plant. This basically means that a better label will give you a happier, more successful gardener. And we all know that a successful gardener is a repeat customer.

Some examples of our labeling (actual size may vary): OLERS MOJITO HOST CHIL CHEF JE IOMEM. **Viette's Little Suzy Black-Eyed Susan** Rudbeckia fulgida 'Viette's Little Suzy' Sunset Horizon GROU Blew Blanket SWAMP MILKWEED Hueblew Natives^M Green Carpet Cherry Explosion™ Hydrangea **Spider Lily** Tradescantia virginiana Hydrangea macrophylla McKay' PP#28757

Custom Pre-Pricing

One of the most time-saving tools that we can offer you is our custom pre-pricing. With little input on your end, you can have a ready-to-sell product as soon as you pull it off of the truck.

Your pre-pricing label is custom built for you. In addition to having cultural and container size information, it can contain any or all of the following items:

- Company name and/or logo Phone number
- Website

- Retail Price
- Discounted/multiple (x for \$xx) price SKU
- UPC Barcode (either our codes or your own)

We also have a specialty label available with a perforated removable section to make check-out easier for both the customer and your personnel. The possibilities of what you can put on your pre-pricing label are nearly endless.

For more information about our custom pre-pricing, call 856.455.0926 and ask for Becky or email retailpricing@centertonnursery.com.

Point-of-Purchase

We like keeping POP signage as simple as possible. Our displays require mere minutes to set up and use as little square footage as possible. We attempt to get as much info on them as possible, while keeping them short, sweet, and to the selling points. Many of our signs are an easy-to-handle 16"x30" and fit in a custom-made holder, making it easy to swap one sign for another as the seasons (or your needs) change.

Research and testing has shown us that the future of POP is going to be retailer specific, meaning your name coupled with our brands. We now have the capability of printing our own custom POP signage. It can be one of our standard designs incorporated with your company logo, or we can do 100% custom work to fit any sign-holder that you currently use.

For more info on our POP signage or other marketing support that we can offer you, please feel free to call us at 856.455.0926.

Freight / Shipping Info

Most deliveries are made in our own rolling-rack or caged trailers to ensure damage free shipments. We hire independent truckers to pull these units and their drivers are almost exclusively regulars who understand our loading/de-livery system. Freight is charged at cost. That cost is determined by an annual review of direct shipping expenses. Based on those averages, freight charges are based on a percentage-plus-drop basis. East-coast based trucking is not cheap because of excess regulation, extraordinary highway taxes and a glut of traffic bogs.

In normal situations using our own trailers, the minimum charge for freight is based upon the haulers' minimums. On orders of approximately \$2000 and up, shipping rates are reasonable and efficient. Smaller orders are less so, because the receiver is still paying for a delivery based on an \$2000 plant volume for delivery on our own trucks (\$2300-2600 for common carriers). Our rates throughout the Northeast range from 8-12% for local runs to 23% for runs reaching to North Carolina or southern New Hampshire.

In cases of certain long distance runs we can arrange special low cost deliveries with back-haul trucking firms. These drivers do not assist in unloading, and do not have decked trailers, but their rates are quite good and we can load your order on rental rolling racks. These rolling carts are then collected by the rental agency a few times a year. They are expensive, but if loaded to the max, they are more efficient than a floor load (on a per-unit freight cost). We use them regularly to ship to the midwest or southern states. This is also an option for Ohio, the Carolinas and other mid-distance states. Back-hauler response time is dependent upon their availability and geographic happenstance, however shipment usually happens within a few days after the order is placed. During peak shipping season (April - June), call to reserve truck space 3-4 days in advance. Shorter notice can work, but truck space is limited. During off peak seasons, 4-5 business days pre-notification is usually ample. Exceptions would be below minimum orders and/or runs in excess of 200 miles from us. We make every reasonable effort to accommodate.

Pick-ups are always welcome. For fast pick-ups, please order 24+ hours in advance. Pick up hours are 7:30 AM to Noon and 1:00 to 4:00 PM, Monday through Friday, 8 AM to Noon Saturdays (in peak season). Other times are based on availability of loaders and by appointment only.

Climate and Conditions

We're situated in South Jersey, ideal for nursery production. Water is clean and land is drained, affording superior disease control. We border USDA hardy zones 6/7. Seasonal growth comes strong and healthy. Plants emerge hardy and ready for Mother Nature's new spring. Our products are container grown and can be installed all year. Soil mixes are designed through responsible technologies merging the best new ideas with the tried and true. Imported amendments are blended with indigenous minerals for quick native soil interfacing and landscape performance.

Plant Health @ Centerton Nursery

We get asked all the time, "Do you spray chemicals on your plants?" The short answer is, "yes." The key components of our pest/disease management program are preventative care: biological controls and beneficial insects The balance consists of chemical applications where they are called for. The one thing we don't do: use neonicotinoids. So when a consumer asks you if our plants were treated with neonics, you can confidently say, "No."

Let's Get Social

We dedicate a lot of time (especially in the height of the season) to managing our social media presence. Facebook is a great source for weekly updates about our product. We are also very active on Instagram, with both the nursery and specifically BlewLabel® Plants having their own channels.

Online Availability/Ordering

Navigate your web-browser to store.centertonnursery.com and log in to place orders, update your retail pricing / sku information, or pay invoices. This system displays our live availability, making it the most accurate and user-friendly way to get availability information. If you do not yet have a username/password, email us at orders@centertonnursery.com and we can have you up

and running in minutes. Paperless ordering can save more than 250 pages of paper per year (per customer) and that number will only get better with time as we discover new ways to cut down the clutter!

Pricing

Plant pricing is based on volume per line-item per transaction. For most plants, we have as many as three wholesale price points, that is: 10-49 (what we consider normal wholesale list price), 50-199 (4% off list), and 200+ (another 4% off the previous category). We relax the 10-per pricing to quantities of 5 and above for Hasslefree® Roses to help you offer a better assortment. When purchasing in non wholesale quantities, we charge one dollar more per unit from ten down to five, and two dollars per unit for anything less. For items sold in trays, the price is the same from one to one-hundred.

Acreage & Greenhouse Square Footage

We have 226 contiguous acres. 190 of this is currently in container production, another 40 acres is our field division and bare-root production. All-told, we have around 2.4M sq. feet of greenhouses, 70,000 of which is used for propagation. We propagate around 50% of our own liner needs. The main propagation area of 45,000 sq. feet turns two whole crops each year. We also depend on nearly two dozen other propagation supply companies, mostly for proprietary (patented) starter plants.

What We Grow / How We Grow

Hundreds of new plants are released from dozens of growers and breeders around the world every year and we try to stay at the forefront of the market by selecting what we believe to be the best available. We attempt to move beyond the hype to learn which claims play out true. Poor ones are discarded while questionable ones are tested further and good ones are introduced. In addition, we travel around the country (and often around the world) to get firsthand experience with these plants before they hit the U.S. market.

We produce containerized flowering plants for the independent garden center and landscape industries. Our selection is large, with 100+ color items available any date from April through October. Typical sizes for us range from Pints to 3 gallon containers.

Plants are grown in soil-less mix, making for clean and consistent performance. It is comprised mainly of peat moss and pine bark fines. We employ tried-and-true cultural practices, as well as high-tech treatments to ensure a minimum of problems for our customers. At any given time, plants contain approximately six weeks of adequate nutrition for shelf life.

Centerton Nursery History

Centerton Nursery's history began with Donald McAllister, Cooperative Extension Agent for Dekalb County, Illinois. In 1940, Don was the assigned supervisor to a top secret government production of hemp (marijuana), the raw material used for rope needed by the U.S. Navy. After the war, there was notoriety of the projects immense success. Also in the 1940s, the well-known C.F. Seabrook of food processing fame, learned of Don's accomplishments. Seabrook was determined to have Don relocate and manage his 30,000 acres of vegetable production. At this time, a young Ray Blew also accepted a position to manage a farm division at Seabrook Farms. The two established a lifelong friendship. After retiring from Seabrook in 1970, Don started Centerton Nursery. By 1974 it consisted of 10 greenhouses on 9 acres and no employees. Soon after, Don took ill and wanted to sell this new business. Having returned from six years in Latin America, managing food production facilities, Ray Blew was in the market for a business of his own. He then purchased the nursery from Don.

Ray, his wife Marlene, and their first employee, Rosie Belle Clark, began building the operation. Their first crop was Azaleas. The Blew's son Denny, graduated from Delaware Valley College, and following a few odd jobs, entered the company in 1977. Today, the third generation (Donald [named after the company's founder], Bob, and Amy) now own the farm and have taken over the day to day operations, and they do their best to fill some very big shoes. Ray left us in early 2021, and we live in his shadow every day. He's still around here - under every leaf and around every corner; if you listen hard enough, you can hear him saying things like, "Life's tough," and "I wouldn't do it that way."

Our People

Ours is a company with five family members involved on a full-time basis. We employ nearly an additional 110 other people to serve as managers, supervisors, coordinators and laborers.

Our diverse staff hails from many different nations. Job backgrounds include: engineer, agronomist, professional speaker, horse trainer, college professor, food technologist, banker, war advisor, multi-linguist, notary public, amusement ride designer, professional musician, pickle picker, amateur body-builder, commercial crabber, and a part-time pizza delivery-man.

Baltimore, MD - Baltimore Convention Center

- Cultivate, July 11-14. 2026, Columbus, OH - Greater Columbus Convention Center

Visiting Centerton Nursery

We always love having our customers by for a tour or a visit. Please give us a day's notice and come on down.

We are located about one hour from either Philadelphia or Atlantic City airports, less than a hour from Wilmington, DE, two hours from Baltimore, three from either New York City or Washington, DC, and five hours from Pittsburgh.

Many Thanks

I say this year after year, but we really do have some of the best customers in the world, and we really would be nothing without all of you! Thank you for sticking with us, in good times and bad. The independent garden center industry is the biggest driving force that molded our company into what it is today.

The Walters/Hop, Hoffman, Colibraro, May, and Sperzel families: the knowledge and friendship that you have extended to us is priceless. You have all been pivotal in building our business through the years, and I can't begin to thank you enough.

Steve Castorani, Tom O'Connell, Dan Waterhouse, John McDonough, Kevin Hurd, Dr. Charlie Hall, Mike Klopmeyer, and Karl Batschke for friendship, advice, and great plants.

Our incredible sales team, who relentlessly peddle our wares throughout the country and are constant supporters of our products, our company, and our family. Specifically, I'd like to take a moment to thank Dan Seik, who retired earlier this year. Dr. Dan joined us nearly forty years ago. He helped mold the company into what it is today. Through many of our milestones over the years, Dan has been here, always the promoter of everything Centerton Nursery, and always being a driving force in our sales team. From the bottom of our hearts, thank you, Dan, for your decades of helping make this company the best it can be.

Great employees who give us service late night after late night, year after year. A knowledgeable and cooperative management team that always finds a way to get the job done. And a fantastic office staff for putting up with all of us.

Stephanie Cohen, who has always been a great supporter of our products, and above all, a true friend.

To all who help me proofread this catalog, without whom this would be nothing more than a pile of misspelled words and misplaced text, I sincerely thank you for your extra sets of eyes.

My siblings for always knowing what I need to know, saying what I need to hear, doing what I need done, and being where I need you to be. Hove working with both of you. You two are a big part of what makes coming to work every day effortless.

My parents and grandparents for raising me to be a good businessman, very good friend, and an excellent parent (or at least I hope I'm all those things). And Pop, we sure do miss you around here! My daughter Elinor and my son Preston. There is no end to the joy you bring to all our lives. Words cannot express how much the both of you continue to lighten my life on a daily basis.

And last, but far from least, my amazing wife, who has to put up with me each and every day. Marrying into a farming family is never an easy thing, but you have done it, as you do all things, with style and grace. You make my world go round.

And for anyone whom I may have missed (I'm sure there are many), I profoundly apologize, and thank you.

Many thanks to all, and have a great season!
